MACPHERSON'S OSSIAN

*"Ossian, sublimest, simplest bard of all
Whom English infidels Macpherson call."*

JAMES MACPHERSON, a young Highland schoolmaster and poet, born at Ruthven in the parish of Kingussie, Inverness-shire, in 1736, became tutor to the son of Mr. Graham of Balgowan in 1759. In the course of his travels with young Balgowan (who afterwards became Lord Lynedoch) he met at Moffat Wells the Rev. John Home, author of the now forgotten tragedy of *Douglas*, to whom he showed what he said were fragments of ancient Gaelic poetry still recited in the Highlands. One of the pieces, *The Death of Oscar*, he translated at Home's request. It greatly pleased Home, the Rev. Dr. Alexander Carlyle, and others, and when Macpherson produced and translated some fifteen or sixteen more pieces, they strongly urged him to publish them. They were finally turned over to the Rev. Dr. Hugh Blair, Professor of Rhetoric in the University of Edinburgh, for that purpose, and they appeared in a thin volume in July 1760 as *Fragments of Ancient Poetry collected in the Highlands of Scotland, and translated from the Galic or Erse language*, with an introduction by Blair, who declared the poems to be "genuine remains of ancient Scottish poetry." Professor Adam Ferguson, John Home, Dr. Blair, Dr. Robertson the historian, with other competent judges, were loud in their praise. Thomas Gray, the poet, also thought well of them, but was doubtful "whether they were

the invention of antiquity or of a modern Scotchman." A subscription was raised to enable Macpherson to return to the Highlands with the object of collecting other pieces, especially the longer poem or epic relating to the wars of Fingal, the existence of which was hinted at in the introduction to the *Fragments*. To all appearances the tour was successful, for in 1761 Macpherson published *Fingal*, an epic in six books, and two years later *Temora*, in eight books.

It was assumed that as far back as the third century, in the remote Highlands and islands of Scotland, there existed a people who possessed not only noble and generous qualities of the highest type but also a strong poetic fervor which was nourished and kept aglow through the centuries down to our day. Some there were who had their doubts about the authenticity of the poems, others there were who disbelieved, but a still greater number clung to the idea, as Gibbon puts it, that "Fingal fought, and Ossian sang." By way of a test David Hume the philosopher put the question on a simple and concise issue: Show us the original poems and manuscripts from which you have made these translations and tell us how they have been preserved during so many centuries. To Hume's appeal Macpherson vouchsafed no answer. "The absurd pride and caprice of Macpherson himself, who scorns, as he pretends, to satisfy anybody that doubts his veracity," tended, as Hume says, to confirm the general scepticism. This scepticism threatened to damage the reputation of more than one of the critics, chief of whom was Dr. Blair, whose elaborate *Critical dissertation on the poems of Ossian the son of Fingal*, published in 1763, was written "with more zeal than discretion." To combat this growing unbelief Dr. Blair procured from eleven persons of reputed authority in the Highlands letters in favor of the authenticity of the poems and affirming that at the time when *Fingal* and *Temora* were published there were several persons living in the Highlands and islands who had either old Gaelic manuscripts in their possession or could recite long passages from traditional Gaelic poetry similar in subject and composition to those published in English by Macpherson.

But this was not deemed sufficient to allay the suspicion which still clung to Macpherson, the doubters persistently demanded a sight of the original poems before the charge of fraud against him could be withdrawn. It was all without avail, the only "originals" existing being in the handwriting of Macpherson himself or in that of his amanuenses.

On the continent of Europe, however, the effect of Macpherson's Ossian was wide and enduring. "The translation of Caesarotti initiated a new poetic

school in Italy. In Germany, then going through its romantic stage, it was hailed with rapture. Klopstock wrote turgid odes after its worst style; Herder gloried in it; Bürger versified it; Schiller found rare beauty and grandeur in the life of Celtic past with its background of mist; and Goethe tried his skill in translating it; and his *Werther*, to express his agonised emotions, turned to the melancholy bard of the North, and in his strain pours forth his abject woes. Voltaire laughed his dry laughter like the crackling of thorns over it, and for a while France was unthralled. At last even it gave way to the spell, especially when Napoleon, who knew it through the Italian translation, and loved the grandiose, was moved to admiration for 'Ocean', as he spelt it, carrying it with him as his favourite reading during his campaigns. French parents found baptismal names for their children in its pages." Oscar I., King of Sweden, the son of Napoleon's marshal, Bernadotte, was named after the son of Fingal, and to this day Oscar has continued a favorite name in the Swedish royal family.

"No competent Gaelic scholar," says Mr. G. M. Fraser, Librarian of the Aberdeen Public Library, "will be found in Europe who would take up the attitude that Macpherson's work, either in respect of the Gaelic 'originals,' or the English translation, was authentic"; and he concludes: "it is much to the credit of Gaelic scholarship of our own time that, uninfluenced by racial feeling which previously must have affected impartial judgment of the work, it has finally rejected James Macpherson and his 'Ossian', which can now be set down as one of the most remarkable literary impostures that has happened in Britain in modern times."

It may be mentioned that the Library's collection of Ossiana has been greatly increased by the gift of a sum of money for that purpose from a gentleman who desires to be known simply as "F. H." To Mr. J. Norman Methven, of St. Martin's, Perth, Scotland, the Library is also indebted for the gift of several scarce editions, including a copy of the rare second edition of the *Fragments*.

The list which begins on page 424 comprises not only what is in The New York Public Library but also some titles gathered from other sources with the aim of making it a fairly complete list of works on the subject. The works which are in the Library have the call-number added at the end of the title — the others are to be understood as being not at present in the Library collection.

GAVARNI AT WORK

THE present exhibition of "Recent Additions" to the Library's Print Room includes four corrected trial proofs of lithographs by Gavarni. Besides showing how his drawings on the stone looked in their pristine freshness, they illustrate this artist's way of seeing his work through the press. Most of his lithographs were done for journals. But for him it was not only a matter of turning over a drawing to the lithographer and letting it go at that. He watched with meticulous care over the printing. Scribbled notes, "too heavy here," or what not, on these proofs and others which exist, bear witness to that. Finally there came approval in his O. K., "ready to print," with the added blue stamp of the printer, "model." Below the pictures he wrote the titles; the lettering, too, he looked after, style of type, spacing, borders. Under the print here reproduced, he wrote:

"Le Manteau d'Arlequin.

"Le Mosieu de la débutante (put this as a sub-title in the centre)."

Along the margin of the same proof he penned: "These proofs are bad. No doubt these are proofs for the lettering only. I beg Lemercier not to fail to send me my trial proofs." In other words, he intimates that the proofs are too poor to have been taken to show the printing; they were evidently hurriedly pulled so that Gavarni might indicate on them the lettering to go on the print. Perhaps a bit of irony on the part of the artist. At all events, the picture as published is no better than this proof — is not quite as good.

The clear light which these proofs throw on Gavarni's manner of working illuminates also his attitude toward his art and toward life. He was not a facile maker of "comics," but a serious observer and a remarkable ironist. He made his point — and makes it to-day — not by any distortion, but by a remarkably penetrating recording of the mental makeup of classes and individuals. It is just because he was, and did, all this, that one welcomes this opportunity to look over his shoulder as he works. It is not unlikely that one may be led to compare his art with much that passes for pictorial humor in our contemporary press. Gavarni is an outstanding figure in the history of art and of pictorial satire. In that lies a distinction and a difference.

NEWS OF THE MONTH

GIFTS

DURING the month of May, 1926, there were received as gifts 5,534 volumes, 10,500 pamphlets, 58 maps, and 5 prints. Some interesting and important items were the following:

Miss Gertrude Colles, Morristown, New Jersey, gave the Library a collection of 940 manuscript letters sent and received by Mr. James Colles, from 1801 to 1870. This gift was received through Col. Henry Metcalfe, grandson of James Colles.

In continuation of her previous gifts, Mrs. Anna George de Mille gave a collection of manuscripts, clippings and pamphlets, including correspondence of Henry George from about 1868 to 1903, also two posters relating to single tax.

Mr. Henry A. Forster gave two copies each of three reports of the New York State Bar Association Committee "Upon the Duty of Courts to Refuse to Execute Statutes in Contravention of the Fundamental Law"; and copies of the original questionnaires, with answers and mailing list, written to the advocates of the recall of judges and the recall of decisions; also a volume of letters, 1916-1917, relating to the second and third reports, with mailing list of the third report.

From the "Federal Valuation of the Railroads in the United States" came a large collection of reports, decisions, etc., of railroad and utility commissions, and other documents, in all 934 volumes, 172 pamphlets, and 40 periodicals.

Mrs. George Kennan gave 10 volumes (5 relating to Siberia) and two albums of members of the Imperial Duma; also 19 envelopes of clippings from Russian reviews, mainly relating to the Caucasus.

From Miss Florence P. Sanford, East Orange, New Jersey, came a collection of manuscripts of George Alfred Snow, including the manuscript of his book, "A Book of Proverbs telling the truth, the whole truth, and nothing but the truth, about money," four books of "Remembrances," charts, diagrams, pamphlets, and miscellaneous papers.

From Mr. Denys Wortman came his original drawing for the illustration which appeared in the New York World of April 14, 1926, "Outside of that cowboy book I showed you, there ain't a decent book in the whole darn library."

The C. A. Nichols Company, Springfield, Mass., gave the twelve volumes of "The New Larned History for Ready Reference, Reading and Research . . . based on the work of the late J. N. Larned . . . Donald E. Smith, Editor-in-Chief," Springfield [c. 1923].

Mr. Darwin P. Kingsley presented an album of photographs of the old Madison Square Garden. Mr. Augustine J. Smith gave thirteen volumes

of "Janice Meredith" transcribed into Braille. Mr. Edward L. Stone gave a copy of "Typographia: An Ode on Printing, Reissued in Photographic Facsimile from the Williamsburg Edition of 1730 in the John Carter Brown Library," Roanoke, Virginia, 1926. (The first book printed in the American Colonies relating to the art of printing.) Of this limited issue, printed by the Stone Printing and Manufacturing Company, the Library's copy is No. 551. From Mr. J. Christian Bay, The John Crerar Library, Chicago, came a copy (No. 96 of 100 privately printed in Holstebro, Denmark, 1925) of "Robert Burns, a Poem, by Holger Drachmann" [translated by J. Christian Bay].

From Lady Choi Song Sull Dang, through Mr. Y. Oda, Foreign Affairs Section, Government General of Chosen, came her photograph and three volumes of her poems. Sir Hormusji Cowasji Dinshaw, Kt., MVO., O.B.E., Aden, Arabia, gave a volume of "Indo-Iranian Studies . . . contributed by European, American and Indian Scholars in Honour of Shams-ul-Ullema Dastur Darab Peshotan Sanjana," London, 1925.

From Mr. John Cox, Jr., came a large parchment deed conveying land in Water Street, New York City, from Nicholas Carmer to James B. Patterson, 1803. Mrs. Samuel A. Mangam, Cairo, Greene County, N. Y., gave two volumes of "The Religious Intelligencer," Nos. 18 and 19, New Haven, 1833-34. From Mr. Richardson Wright came "House and Garden's Second Book of Interiors" [c. 1925]; and "House and Garden's Second Book of Houses" [c. 1925]—both edited by Richardson Wright and Margaret McElroy.

The following interesting collections were received: from Mrs. Sophie F. Goebel, 20 volumes of maps and atlases, mainly of New York City; from Mrs. Richard M. Hoe, a collection of books and pamphlets relating to the World War; from Mr. F. Levi, a collection of portfolios containing clip-pings illustrating interiors, gardens, Italian lattice loggias, furniture, landscapes, etc., 44 in number.

The following additions to the Library's print collection were received: from Mr. Payson Thompson, two copper plates, etched by James McBey ("Hermon: Cavalry marching on Damascus," "Surrender of Damascus"); from Mr. Henry G. Keller, Cleveland, his etching, "A Roadside in Spain"; from Mr. Wilson Silsby, San Francisco, his etching, "Lazy River"; from Mr. Wilbur Macy Stone, five engravings ("Falls of Toccoa," "Tallulah Falls," "Pittsburg," and others).

ADDITIONS AND USE OF THE LIBRARY IN MAY, 1926

DURING the month of May, 1926, there were received at the Library 17,768 volumes and 13,565 pamphlets. (These include the additions to both Reference and Circulation Departments.) The total number of readers recorded in the Central Building was 153,954. They consulted 302,029 volumes. Visitors to the building numbered 322,886.

POEMS OF OSSIAN

ENGLISH EDITIONS

The POEMS of Ossian, being a literal translation from the original Gaelic into English; with a dissertation concerning the era in which the poet lived; and a critical dissertation by the late Rev. Hugh Blair, D.D. Collected and translated by James Macpherson, A.M., and published under the patronage of the Highland Society of Scotland. Edinburgh, 1762. 8°.

An obvious fraud. Mr. J. N. Methven writes that he has a copy in his possession, "The title page, page containing the short preface and the contents page, are different paper from the rest of the book. I think it is the Oliver & Boyd, Edinburgh, 1812, edition really."

The WORKS of Ossian, the son of Fingal. In two volumes. Translated from the Gaelic language by James Macpherson. The third edition. To which is subjoined a critical dissertation on the poems of Ossian. By Hugh Blair, D.D. London: Printed for T. Becket and P. A. Dehondt, 1765. 2 v. 8°.

The Library has only v. 2, containing: *Temora*, an ancient epic poem, in eight books; and several other poems. **NDO**

The words "Third edition" refer to the previous publication in a separate form of *Fingal* and *Temora*.

The WORKS of Ossian the son of Fingal. In two volumes, translated from the Gaelic language by James Macpherson. The third edition. Dublin: Peter Wilson, 1765. 8°.

The POEMS of Ossian. Translated by James Macpherson, Esq., in two volumes. A new edition, carefully corrected, and greatly improved. London: Printed for W. Strahan; and T. Becket, in the Strand, MDCCCLXIII. 2 v. 8°. **NDO**

WORKS of Ossian. Darmstadt, 1773-75. 2 v.

The first English reprint of Ossian in Germany. Published at the suggestion of Johann Heinrich Merck.

The WORKS of Ossian, the son of Fingal... Edited by J. H. Merck. Francfort und Leipzig: Guilhaumann, 1783. 4 v. 8°.

A new edition of 1777.

This edition contains Clark's *Answer to Mr. Shaw's Inquiry*, as well as Macpherson's *Dissertation concerning the aera of Ossian* in v. 1. At the end of the fourth volume an alphabetical index of names and things is given; the specimen of *Temora's* original added to the English edition being omitted.

The third volume contains Macpherson's two dissertations and Dr. Blair's Critical dissertation.

The POEMS of Ossian, translated from the Galic language by James Macpherson, Esq., and turned into blank verse, by the Rev. Anthony Davidson. Salisbury: Printed by Brodie and Downing [c. 1810]. 4 p.l., 388 p. 8°. **NDO**

"The poems of Ossian, as translated by Mr. Macpherson, however beautiful in image and metaphor, are, in the reading, abrupt and unpleasant. The intention of the present edition, by turning the poems into blank verse, is to make them more soft and musical to the ear. The translator's language is carefully preserved throughout the work, save where other words of the same meaning are occasionally made use of for the sake of measure."—*Advertisement*.

The POEMS of Ossian in the original Gaelic with a literal translation into English and a dissertation on the authenticity of the poems by the Rev. Archibald Clerk... Together with the English translation by Macpherson. Edinburgh and London: William Blackwood and Sons, 1870. 2 v. 4°. **NDO**

v. 1: 4 p. l., lxvi, 503 p.; v. 2: 3 p. l., 584 p.

Contents: v. 1: Dissertation on the authenticity of the poems of Ossian with an account of the various Gaelic editions, translations, etc., which have been hitherto published. Ca-Lodin (Duan i-iii). Covala—a dramatic poem. Carric-thura. Car-hon. Oinamhurul. Golanadona. Croma. Calhon and Colvala. Fingal (Duan i-iii).

v. 2: Fingal (Duan iv-vi). Temora (Duan i-viii). Conloch and Cuhona.

The explanation of proper names and notes are given at the end of each poem.

Published at the expense of John, third Marquess of Bute.

A reprint of the Highland Society's edition of 1807 with a literal translation of Clerk's own on alternate pages and Macpherson's English at the foot of the page.

"The edition is creditable to the industry of the editor; but not to his scholarship. He has written a very readable preface, although the Ossianic mania has carried him into giving expression to very serious philological heresies. But no one expects to find in the advocates of Ossian earnest votaries of philological science. The voluminous notes illustrative of the text, and explanatory of the so-called proper names, which must have cost Mr. Clerk such a waste of time, though not of learning, might have been expunged with great advantage to the reader, and benefit to the editor's reputation... Let us hope that this is the last occasion on which the public will be asked to accept as genuine a work which is only an audacious attempt at imposture."—*W. M. Hennessy*.

"In this volume the text of Ossian remains as it was left by Macpherson in his edition of 1773, and the poems are presented in the final order arranged by him. The four last translations only, 'The Battle of Lora,' 'Temora,' 'Conlath and Cuthona,' and 'Berrathon,' have owing to the exigencies of space been omitted. Some curtailment has been made of the translator's notes, many of which are irrelevant. All, however, have been included which are necessary for the understanding of the text." — *Editorial note.*

Temora ought to have been included in this edition, as book i. is founded on a genuine tradition, the remainder being Macpherson's own composition. The editor, it may be mentioned, is a believer in the authenticity of the poems.

"It should be stated that, while the editor is responsible for what he considers a more apt arrangement of the poems, and also for a few notes, this Centenary edition is otherwise reprinted from the edition produced in 1822 by Mr. Hugh Campbell."

Beyond a rearrangement of the poems and the addition of a few notes "this centenary edition is otherwise reprinted from the edition produced in 1822 by Mr. Hugh Campbell. The notes to which the initial C is appended are those by Mr. Campbell, and are generally to correct some statement of Macpherson—though some of Mr. Campbell's own correctional notes have not been reproduced, often in

error as he was himself. The great majority of the notes without any initial are Macpherson's own comments."

The "introductory note" (p. ix-xxiv) by Sharp is simply a rehash of earlier opinion and contributes nothing new to the elucidation of the Ossianic question.

Denis commenced by translating from Cesarotti's Italian version (1763), a fact which "explains the presence of the notes from Cesarotti interspersed throughout his translation." VXH (121)

"The text is excellent and the author is to be congratulated in focusing a long, difficult and highly technical subject so well into one small volume. The book should meet with a good reception from art students, architects, and others requiring information regarding sailing ships from the earliest periods for purposes of decorative work, etc., while the wealth of illustrations make it an excellent reference work." — *Nautical magazine*, March, 1926.

Jeans, J. H. *Atomcity and quanta, being the Rouse Ball lecture delivered on May 11, 1925.* Cambridge, England: University Press; New York: The Macmillan Co., 1925. 64 p. 12°. 75 cents.

PAW (117)

"The object of the writer, clearly to be discerned in a perusal of the book, is to deal with the contra-

dictions which at once appear when an attempt is made to reconcile phenomena of quanta with the mechanical laws which govern the behaviour of natural forces... The book concludes with a sigh, as clearly as print can convey it: 'Not much meditation is needed to convince us that we are still very far from understanding the working of the atom or the true meaning of atomcity and quanta.' — *Electrical review*, London, March 26, 1926.

QAS

"A book for beginners. Its object is to provide a sketch in outline, approximately correct in its proportions and not overburdened with detail, of the evolutionary science of today... I propose to restrict myself to the animal kingdom, ignoring plants and ignoring protists, in the first place because I am personally less ignorant regarding the animal kingdom, and in the second place because I believe much liability to error is introduced into evolutionary speculation by the absence of such restriction." — *From the preface and introduction.*

Contents: Introduction, Lord Balfour. Magic, science and religion, Bronislaw Malinowski. Historical relations of religion and science, Charles Singer. Science and religion in the nineteenth century, Antonio Aliotta. The domain of physical science, Arthur S. Eddington. Mechanistic biology and the religious consciousness, Joseph Needham. The sphere of religion, John W. Oman. Religion and psychology, William Brown. Science, Christianity and modern civilization, Clement C. J. Webb. Conclusion, William Ralph Inge.

"The spirit of antagonism is gone, and there is an earnest seeking after not compromise, but reconciliation. The pages breathe a sweet reasonableness, and one almost longs—in unregenerate moments—for a little clashing of swords." — *Nature*, April 3, 1926.

This classic was first published in 1877, with a 2d revised and enlarged edition in 1894. The present work is a reprint of the latter and has no changes except a few corrections and references from the author's own copy.

Ricardo, Harry R. Engines of high output. Thermo-dynamic considerations. London: MacDonald and Evans, 1926. viii, 110 p. diags. 8°. 7s. 6d. **VFM (121)**

Revision and amplification of a series of articles published in 1916. Stresses the thermodynamic side, with the intention of issuing later volumes on the mechanical features. Has endeavored, so far as possible, to avoid the use of mathematical calculations or formulas "partly from his horror of such."

"The author has advanced theories, particularly with regard to combustion, which should stimulate thought and lead to further investigation." — *Mechanical world*, April 16, 1916.

* **Searle, G. F. C.** Experimental optics, a manual for the laboratory. Cambridge, England: University Press; New York: The Macmillan Company, 1925. xvi, 357 p. illus. 8°. \$5.35. **PED (117)**

"Describes the optical experiments carried out by Dr. Searle's practical classes at the Cavendish Laboratory, Cambridge. A good deal of theory is given in addition to the description of a large number of experiments and experimental methods... The apparatus required for most of the experiments described are of a very simple nature... Contains a fair account of mathematics of a simple nature, and the experiments are well illustrated by numerous diagrams." — *English mechanics*, March 5, 1926.

Also reviewed in *Nature*, March 20, 1926.

Stoddard, Lothrop. Scientific humanism. New York: Charles Scribner's Sons, 1926. 177 p. 12°. \$2.00. **OAP (117)**

"Will we adjust ourselves to the new world which modern science has disclosed? Is there to be a new flowering of the mind and spirit quickened by the vast extensions of knowledge and power with which we have been endowed, as the Renaissance flowered in Humanism four centuries ago? Shall our present transition time with all its unparalleled possibilities for good and for ill culminate in a great civilization or in a great catastrophe?... To offer some suggestions for sound thought and action, this book has been written." — *Foreword*.

Strouse, C. R., and P. W. WEBB. Automobile four-wheel brakes. Philadelphia: David McKay Company, 1926. v, 108, 82 p. illus. 8°. \$2.00. **TON (121)**

Copyrights of the International Textbook Company. The first 108 pages, covering transmission and control mechanisms in general, bear the dates 1914 and 1921. The rest of the book (copyright 1925, 82 p.) deals with the construction, operation, adjustment, and lubrication of the important four-wheel brakes. Good illustrations.

* **Studies in bleachery management.** Compliments of B. F. Perkins and Son, Inc., Holyoke, Mass. [Boston: Frank P. Bennett and Company, Inc., cop. 1925.] 273 p. 8°. **VLF (121)**

Although published in the interests of a machinery manufacturing company, this work by a practical engineer is filled with technical information on equip-

ment and methods required for the successful bleaching of cotton goods. Originally appeared as a series of articles in the *American wool and cotton reporter*.

Sullivan, J. W. N. Three men discuss relativity. London: W. Collins Sons and Company, Ltd.; New York: Alfred A. Knopf, 1926. xxx, 233 p. 12°. \$2.50. **PAT (117)**

A mathematical physicist, a philosopher, and an ordinary intelligent person engage in a series of dialogues which for the most part steer clear of hard mathematics (which are left for a formidable looking appendix). Endeavors to describe the new entities introduced by Einstein and their relation to the old ones of Galileo and Newton. The general reader should find much of interest.

Toulmin, Harry A., jr. Trade-mark profits and protection. New York: D. Van Nostrand Company, 1926. xv, 258 p. illus. 8°. \$4.00. *** V (121)**

Author strives to avoid a dry-as-dust presentation and to make his work entertaining. This he does by giving practical examples and actual instances. There is much advice as to what to do and what not to do, with appendices containing regulations of the United States, of the individual states and of Canada, as well as various international agreements.

Turner, H. H. A voyage in space, a course of six lectures "adapted to a juvenile auditory" delivered at the Royal Institution at Xmas, 1913. London: The Sheldon Press; New York: The Macmillan Company, 1925. xvi, 344 p. 2. ed. illus. 12°. \$3.00. **OMR (Stack 3)**

With the exception of an addendum covering the theory of relativity and other recent astronomical advances, the second edition differs little from the first.

"Not a romantic flight of the imagination, such as might have been written by Jules Verne, but an account of a journey by telescope. In other words, it is an elementary book on astronomy... The treatment is at times unconventional, but never dull or obscure, and the interest throughout is maintained by an abundance of appropriate stories and quaint allusions." — *From a review of the 1st edition in Nature*, April 13, 1916.

For brief review of 2d edition see *Nature*, April 3, 1926.

Williams, A. Francon. Surveying for everyone. London: The Sheldon Press; New York: The Macmillan Company, 1925. 114 p. illus. 12°. \$1.15. **VDE (121)**
